REG/ASS

The Clean Cap system protects the end of the pole sections from accidental damage due to misplaced alignment and cleans out the inner female joint every time you unship. Also will stop your sections sinking if dropped into the water.

Fusion is two high modulus carbons fused together as one whilst wrapped on the mandrel. The end result being ultra rigid top kits with no tip bounce, allowing the angler to hit lightning fast bites with ease.

A carbon and resin treatment providing an anti-friction finish that enables the pole to be shipped with incredible ease during wet or dry conditions. This revolutionary surface not only adds strength, but also protects the overall fishing action during hot and cold temperatures.

The first ever formulation of its kind. Exclusive to Reglass production. Nanolith provides unique characteristics of vibration, damping & high strength. The Nanolith is an exceptional molecule, it's a thousand times smaller than a single carbon wire, and creates a bond at atomic level between fibre and matrix.

Super toughened epoxy resin. Developed by Reglass. Following the success of Sun Core, we have modified the molecular structure of Sun Core and enhanced the mechanical performance of the pre-preg. The Super toughened epoxy resin formulation gives an extremely elegant and innovative black colour finish.

High Tensile carbon fibre M55 HS and Ultralight multiwall System 2 M5 classified: **Competition, All round, Carpodrome.** High Tensile 500 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

High Modulus carbon fibre M76 HM and Ultralight multiwall System 2 M7 classified: **Competition, All round, Carpodrome.** High Tensile 760 grade carbon fiber Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Modulus fibres M87 HMS and Ultralight multiwall System 2 M8 classified: **Competition, All round.** High grade 870 carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Grade Pitch Modulus fibers M90 HGS and Ultralight multiwall System 3 M9 classified: **Competition.** Super high 1000 grade carbon fibre and P90JS Black Core S.V.Er Super vibrational damping epoxy resin.

A special resin finish that enables the pole to be shipped incredibly smoothly & quickly. It's applied from sections 5 to the 13m butt section on many of our poles.

This clever technology provides the angler with a silky smooth elastic system. A series of teflon coated inner steps prevents the elastic from making contact with the inner wall of the pole sections.

To increase the technical performances we have engaged a resin system that was used into the aerospace industry, the "Super vibrational damping epoxy resin". The vibrations damping inside the composite structures allow high reactivity products.

The ultimate pre-preg concept. This new resin strongly bonds the carbon fibres & provides the ultimate fishing action.

A fine wrap of pure teflon bonded directly onto the male joints, substantially reducing carbon to carbon wear. A simple twist locks the sections in place. We are the only manufacturer in the world that has this innovative feature.

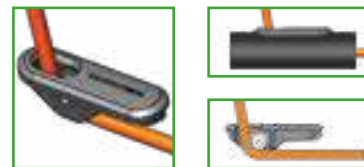

SLOT SYSTEM: Really a new system that is actioning during the fighting moment: this system is permitting us to pull the elastic in the stronger and faster way in order to have a quicker landing of the fish, even if is a real big one.

AB TIP: Ab tip system is permitting to the last kit part to become stronger, stiffer and faster. The tip hole is even bigger in order to use hollow elastic and cones. In this way tip and section B are melted inside a unique spare!

MAVER ROLLER SLOT

MAVER ROLLER SLOT

CODE
00843003

New for 2021 are the superb ground breaking roller slot. The Maver "roller Slot" features an integrated PTFE roller for ultra-smooth flow of elastic. The Roller Wheel situated on the inside of the pole is made from PTFE, firmly held in place with a stainless steel pin. This ingenious design allows the elastic to be held away from the walls of your top kits, by centralising the elastic in the kit, creating a super smooth flow, resulting in more fish being landed.

Drilling template included. Made in Uk.

Signature

Cuscino ergonomico, rifinito in carbonlok, con cuciture di pregio e conchiglia per l'alloggio della roubasienne.
 Paniere a 6 gambe di diametro 36mm di cui 4 telescopiche, su due di queste abbiamo voluto inserire la "bolla di posizionamento a 360°" che permette un posizionamento perfetto su ogni tipo di terreno e sponda.
 Sotto alla seduta troviamo 2 cassette scorrevoli laterali da 3cm e un modulo vano da 3cm portatense; valigetta estraibile in modo bidirezionale che è composta da 3 moduli vano da 3cm unitamente ad un coperchio con maniglia per essere trasportata con grande semplicità una volta estratta.

LEGEND 800 & PACK

This is simply the newest and the best and the highest quality pole you never tried before ! 3 parallel handles, very stiff and light in the meanwhile which is ideal for the silver fishes competitions and the most technical sessions; the best kit for this pole is for sure the MV-R S91. The maximum and the best for the angler who need and want..... simply the best.

GHOST 97 & PACK

The top of the series in the Commercial range: a specific range dedicated to the fisheries, carpodromes and strong use. GHOST 97 is studied in order to include itself characters as stiffness, balancing power and lightness that are all needed by the expert carp angler. It is a single handle pole reliable and nice to use: it can become a superlative pole for the winter times when you use the COMMERCIAL MATCHLITE kit, but in the same way it rests a super pole in the summer when we use the kits COMMERCIAL POWERLITE or the COMMERCIAL POWER and the POWERPLUS ones. In this last case, we suggest to combine these kits with the n°4 COMMERCIAL FORCE spare. This is simply the best choice you can do if you love to fish in commercial waters.

GOLIA CARP

Rod for SPECIMEN fishing with two parallel handles in 11,50mt/10mt, expressly thought to be used in fishing big carps over 10 kg weight. The rod is composed with Mv-R specimen kits. For the manufacturing of the Golia Carp are used high tensile carbon fibers in H55 material, build up and in compression style.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES .

GOLEM SILURO STORIONE

This rod is a SPECIMEN pole really incredible!! It's designed expressly by Reglass to subject high stresses, like fishing sturgeons or catfishes. Into carbon fibers were inserted filament of Kevlar to make the rod much stronger, every piece has got a resistance to the compression incomparable, the rod is 11,5 meters long but with possibility to arrive at 13 meters with the related original spare .

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES .

NIGHTMARE SPECIMEN

This roubaisienne made by SUPER HIGH MODULUS CARBON FIBRE under compression combined to Pan fibers very resistant and super strong in the traction moments. This short pole made in Italy with a super reactive action, is developed for fish over sized fishes not only in lakes but even in open waters. Excellent finishing and it fits a monobrin tip and the newest MV-R Specimen kit.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" POLE SERIES, ON THE 5TH ELEMENT OF THESE POLES.

RENEGADE RX

Short 9 mt pole built thanks to the combination of resins and fibers which are making it super strong and impossible to break! In the meanwhile it is very stiff and balanced: simply the pole perfect to be used in the fisheries where we need to make a lot of weight during the summer competitions. The pole is completed with the MV-R K21 kits, the strongest through the MV-R kit range.

SUPER CARP X5

Entry level pole developed in order to fish carps in the rivers and in the fisheries as well : 13 mt of reliability and strenght combined with a balancing character that permits us to fish and compete in the proper and most comfortable way. The SUPER CARP X5 is originally proposed with the new REALITY K300 kit that could be anyway substituted with the k200 and k 100 when you need to pull and fight with bigger fishes or compete in the hardest conditions and when you need to fish with strong lines, hooks and tackles.

CARP FORCE

Short poles created for fish near the banks in the fisheries. Put over mini poles with the 2 sections kit interchangeable in all the lengths and for the whole range. On the B section there is the slot bush needed for the hollow elastics tension and for pull them during the fight! The highest module carbon fiber is used in combination with the newest resins generation in order to realize the strongest and most reliable short poles in the market!

KIT MV-R S&K SERIES

The Maver experts with the reglass engineers have updated the Mvr range : especially we have made a total new design on the frontal profiles even if we wanted them to fit on the 4th and 5th sections of the last seasons poles ! New super resins and super quality carbon are used for produce them . The range is divided in 2 micro series: the "S" and the "K" series .

The "S" range is divided into different kits: MV-R S91, S71, S51 ! For these kits we have reduced the profiles of the 2nd sections and the frontal profile of the 3rd section. In this way we were able to make extremely stiff and balanced top sets . The "S91" and "S71" have got B section + A section (divided) and we built them with the reinforcement on the 3rd section in order to be personally drilled ! We wanted them ready with ptfе sbush on the top in 2,3mm hole size. The "S51" has got the Ab tip with 3,3mm bush on the top and with the same reinforcement on the 3rd section (for be drilled) . The V ONE is an AB TIP with 2,6 mm top hole which can be chained with different kits as for example the MV-R S91 and the S71 ones, when we need to use hollow elastics or flat floats in the stream !

The "k" series is composed by 2 different kits: the MV-R K41 and the K21, which we wanted to sell as ready slotted kits (on the 3rd section) and with Ab tip which has already got ptfе top bush in 3,3 mm size in order to be used even with big elastics !

COMMERCIAL KIT

A real new range composed by SLOT kits, totally developed and born for the commercial waters. A new AB tip profile was studied in order to have a superlative stiffness and reliability, even thanks to the highest carbon and resins quality. These are proposed and sold just in the length 2.55mt and they can be supported by the special spares as COMMERCIAL SILVERFISH and COMMERCIAL FORCE in order to be selected and used in all the deepest waters and fisheries. All the commercial kits have got the slot system and also the internal ptfe bush with external holes of 3,6mm and 4,8mm.

COMMERCIAL KIT MATCHLITE

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8704K002	2	2.55	MAX 2.3 mm

The top of the series, indicated for fish as carass, f1, little carps and possible to be used for elastics up to 2,3mm.

COMMERCIAL KIT POWERLITE

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8703K002	2	2.55	MAX 2.5 mm

A sensational high quality kit realized with super quality materials which permit us to have a super strong and stiff tackle with a lightweight sensation in the hands, ideal to support elastics till 2,5 mm

COMMERCIAL KIT POWER

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8702K002	2	2.55	MAX 2.8 mm

The correct kit to be used where you need to catch a lot of fishes, rushing in the quickest way. It is supporting elastics till 2,8 mm and is incredibly stiff, reliable and light!

COMMERCIAL KIT POWERPLUS

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8701K002	2	2.55	MAX 3.1 mm

With this kit you can catch many many fishes, in the quickest time and you can win the fight even with the biggest catches without any problem! The biggest carps will be your target with zero worries. Elastic rating up to 3,1mm but we can of course use even bigger ones!

COMMERCIAL KIT CUPPING

CODE	SECTION N°	TOT. LENGHT
8700K002	2	2.55

COMMERCIAL SILVER FISH

CODE	CLOSED	MM	GR
0496700D	1.45	27	50

Light spare (4th section) built in order to increase the length of the 2020 commercial kits range. This is especially studied and suggestable for the kits commercial kit Matchlite and Powerlite.

COMMERCIAL FORCE

CODE	CLOSED	MM	GR
0496800D	1.45	27	68

Strong spare (4th section) built in order to increase the length of the commercial kit range 2020. This is especially studied and built for the commercial kit Power and Powerplus.

FIGHTER

Reinforced spares to be put on the related poles in order to fish shorter without push and break the original pole elements. These FIGHTER are realized with the same carbon fibers but with stronger laminations in order to handle them with force without the risk of damages and breakages, especially during the strike moments. Anyway, when you'll catch a big fish and you need to put more elements below these fighters, you can anyway use the original pole elements in order to fight properly!

FIGHTER N°4 - N°5 can be used on all the 2020 pole range and also with the past years ones!

FIGHTER X2 N°6 - N°7 can be used with the poles created in 2 parallel handles : as for the 2020 season as for the previous years ones (example MVR MATCH, MVR CARP, JURASSIC TRX3, JURASSIK TRX1, ENIGMA MATCH, ENIGMA CARP).

FIGHTER X3 N°6-N°7 can be used with the poles created with 3 parallel handles : as for the 2020 poles as for the previous years ones (example 9901, 9701, 991 MATCH, 991 CARP, etc.)

	FIGHTER X2 PZ. 6	1	1.70	39	163
	FIGHTER X2 PZ. 7	1	1.75	42	180

FIGHTER X3

CODE	MODEL	PZ	CLOSED MT	MM	GR
04959C00	COMBO	2			
	FIGHTER X3 PZ. 6	1	1.70	39	162
	FIGHTER X3 PZ. 7	1	1.85	41	192

KOMBAT

CODE	MODEL	PZ	CLOSED CM	MM	GR
04966C00	COMBO	2			
	KOMBAT 4	1	75	28	83
	KOMBAT 5	1	75	35	105

The KOMBAT spares N°4 e 5 are shorter than the standard poles spares (half size) and they are specifically studied in order to fish near the banks where we can normally find bottom drops: with these special spares we can really find the drops in the most accurate way and fish with a certain precision under these or in the desired strategical points that we find out (without use original spares or longer spares as fighter ones).

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID
8500K002	1	1.74	MAX 3.1 mm	MAX 2.1 mm

The second Kit of series MV-R ghost is the Carp one, it's a monobrin Kit and is very innovative on the European market. It was designed specifically for fishing big carps on the surface, using shorter lines without any problem, and being very conical it owns an incredible stiffness fundamental for fishing with the pellet making noise on the water surface, a technique very popular in the european commercial waters.

KIT MV-R GHOST LIGHT

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID
8501K002	2	1.50	MAX 2.3 mm	MAX 1.6 mm

In collaboration with Maver Uk we decided to designed two kits for surface carpfishing with a special color 'Gun smoke'. The Ghost Light is the lightest of the series and perfect for catch medium size fishes like chubs and roaches. This Kit is compatible with all the MV-R Kits range.

KIT REALITY K100

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID
8705K002	2	2.95	MAX 3.6 mm	MAX 2.6 mm
8705K003	3	4.30	MAX 3.6 mm	MAX 2.6 mm

Really strong Kit, ideal for fish with very big elastics, even with 3,6 mm diameter. Superlative in order to catch big fishes like carps, barbels, cat fishes, as in the big rivers, as in the fisheries or in big lakes. REALITY k100 has got the ab tip solution and we can pull and fight without any matter! Available in 2 or 3 sections, it born with the reinforced little part that is ideal to create the slot version!

KIT REALITY K200

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID
8706K002	2	2.95	MAX 2.8 mm	MAX 2.3 mm
8706K003	3	4.30	MAX 2.8 mm	MAX 2.3 mm

REALITY K200 is expressly indicated for fish in the carpodromes or in the rivers using big floats, medium or big diameter lines and elastics till 2,8 mm size. Reliable and super balanced it is perfect to fish also with the 13 mt pole. The kit is built with the ab tip and is available in 2-3 sections: the c section is made with the reinforced little part that is expressly born in order to put the slot bush on itself.

KIT REALITY K300

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW	ELASTIC SOLID
8707K002	2	2.95	MAX 2.5 mm	MAX 2.1 mm
8707K003	3	4.95	MAX 2.5 mm	MAX 2.1 mm

REALITY K300 is an high level kit ideal for the fisheries with medium light floats and lines. For realize this very nice kit were used the best materials that makes it stiff, reliable and light in the same time. Perfect for fish with elastic till 2,5 mm diameter and ideal to fit with the top quality pole salso in order to compete at the top level! Ab tip kit that is available in 2 and 3 sections: C section has got the reinforced little part where we can insert the slot bush.
